afternoon.

Obituary

The late Mrs. Frank Starr was born in Milo, Iowa, on August 8, 1864. In 1884, as Harriet L. Reeves she was united in marriage to Frank Starr. In 1907 she moved with her husband to Champion, settling west of town where they resided until 1927. In that year they sold the farm and moved to California, returning to Champion in 1930, where they were residing at the time of her death.

When taken ill her condition was not regarded as serious for a time, but as time went on it was apparent that ultimate recovery was impossible and she passed away on Sunday, May 1, in her 68th year.

During her residence here she had made hosts of friends. A devoted wife and mother and an energetic supporter of every women's movement, she was widely known in the vicinity and highly respected. Her demise has caused the deepest regret on the part of all who knew her, and general sympathy is extended to the bereaved husband and family left to mourn her loss.

In addition to her husband, she leaves five children, Mrs. I. Fisher Champion, Robert and Fred, Bozving, Montana, Charles, of Champion and Mrs. Byron Burgess, of Long Beach, Calif. Nine grand children, two great grand children and three sisters also survive her.

The funeral took place Tuesday, May 3, in Champion, Rev. Dawson conducting the funeral service with Christianism of Lethbridge in charge of the burial. The tributes of respect represented numerous families in the community.

Her family have the sincere sympathy of the community in their bereavement.

Moisture conditions, following the recent rains, are such that this year seeding operations are being carried on under better conditions than have prevailed during the last several seasons. The rains have made the farmers more optimistic than for some time. There is a variation in seeding operations ranging from 40 to 60 per cent completed. The estimated acreage for wheat in this vicinity is 35,000 acres, barley 6,000 acres, oats 9,000 acres. Total amount of rainfall up to the last rain was 2 1/2 inches.

While making an attempt to dig a cistern at the back of Bob Maxwell's barber shop a vein of water was struck at ten feet. At present there is three feet of water in the hole. A local analysis was made of the water, and although it was found to be hard, it could be utilized. A sample of water was sent to Edmonton for further analysis. It is quite unusual to strike water in this vicinity at less than one hundred feet.

Mrs. Moffatt entertained at four tables of bridge on Wednesday evening, complimentary to Mrs. A. M. Watt. The honors were won by Mrs. Dupuz and Mrs. Freeze.

Mr. and Mrs. John Cook, who have spent the winter in Calgary returned to Champion this week to look after farming interests here.

GRANLIN
MOTORS

Champion to Have Baseball Team

A well represented meeting was held in G. L. Dupuz's office on Friday evening, April 29, to consider the possibility of forming a local ball team to enter the league which was formed to the north of us last week. G. L. Dupuz acted as chairman and Bob Maxwell was elected as manager of the local team. M. F. Hamilton was elected secretary of the club.

After considering the pros and cons of forming a team and joining the league, the meeting decided to do so. This league will be a six team league consisting of Vulcan, Blackie, High River, Nanton, Staveland and Champion, so the fans can be assured of some good ball for the coming season. Prospects for a strong team here are good, so the fans are advised to get prepared to give the local boys plenty of support by their presence at the games—and it won't be long now as the league opens on Tuesday, May 24th.

HIGGINS—VERSLUYS

The marriage of Miss Rhea Higgins, oldest daughter of Mr. and Mrs. Harry Higgins, to Cornelius Versluys of Champion was solemnized in Vulcan on Saturday evening, April 30, Rev. Victor Smith officiating. Those present were Miss Gertrude Versluys and Mrs. Versluys. The newly married couple will reside on a farm near Champion. Many friends in the community will extend best wishes for a happy and prosperous future.

Women's Institute

Mrs. A. W. Jopling will entertain the Women's Institute at her home on Tuesday afternoon, May 10th. The meeting will be addressed by: Mrs. A. T. Martin, Vulcan, Constituency Convener. "How to obtain Health, Wealth and Happiness in 1932", Mr. R. L. Baker, "The New School Act", Mrs. D. Smith, "Current Events." Community singing will also be a feature of the programme.

Martin Clever's presence in this vicinity means that golf will be played, no matter what happens. The course, for which he was largely responsible, has been gone over completely, the greens being enlarged to standard size and fairways dragged to insure a level expanse for driving. Consequently the golfers are largely in evidence again.

Whether it continues to the end of the week or not, the first days of this week furnished some of the finest and most enjoyable weather possible in any country under the sun. Flawless sunshine prevailed for two days followed by a beautiful rain and more sunshine. When the weather is good here it is very, very good, but when it is bad it is horrid.

Mrs. Farmer, the Misses Gaudin and Helen and Sanford Anderson motored to Lethbridge on Saturday.

Champion Theatre

Wed. May 11th

Report Submitted On The Milling And Baking Qualities Of Spring Wheat Varieties

A report on the milling and baking qualities of Canadian spring wheat varieties has been submitted to the common committee on agriculture.

The report was made to the National Research Council by J. A. Macleod, assistant research biologist, University of Alberta; W. F. Geddes, professor of agriculture, University of Manitoba, and R. J. Larmer, assistant professor of chemistry, University of Saskatchewan.

A co-operative study was made of the milling and baking quality of 25 varieties of spring wheat, now grown in western Canada. Samples were grown in adjacent plots by the Dominion Experimental Farms and Universities in Manitoba, Saskatchewan and Alberta in 1929, 1930 and 1931. Only samples which were found to be placed in the statutory grades by official inspectors were used.

Part of each sample was milled and baked in each of the three co-operating laboratories. Four baking formulas were used. The varieties were classified on the basis of loaf volume, texture, crumb color, general appearance of loaf, absorption and yield of straight flour. These classifications were combined to give classifications for baking quality and milling quality and finally for suitability for export and domestic milling. The last classification is briefly:

1. Varieties which are entirely satisfactory: Reward, Crest, Marquis, Early Red Fire, Renfrew, Red Bos 222 and Supreme.

2. Varieties which are fairly satisfactory: Early Red Fire, Ruby and Early Triumph.

3. Varieties which are unsatisfactory: (a) White wheats: Quality, Amstar and Hard Federation. (b) Varieties differing from Marquis in milling characteristics: Garnet and Kola. (c) Varieties inferior to Marquis in baking characteristics: Garnet, Parker's Selection, Brownhead, Huron, Kitchener, Preston and Marquis.

Varieties which are very unsatisfactory: Early Profile, Dicklow and Vermilion.

Of Marquis, the report states it is "our standard variety and is satisfactory in all respects."

Dealing with Reward, the report states: "Reward has a high weight per bushel and a satisfactory flour yield. It has a very high protein content. The baking qualities are excellent. It gives loaves of large volume with good color, texture, appearance and absorption. Reward has the best milling and baking quality of the varieties tested."

Among the varieties placed in the class unsatisfactory for export or domestic milling is the variety Garnet. The report states:

"Garnet: The test weight and the yield of flour are satisfactory. Garnet differs from Marquis in its tempering properties and cannot be tempered properly when mixed with that variety. For this reason the milling quality of Garnet is classed as fair. The protein content is low. It is satisfactory in absorption and in appearance of the loaves. The other baking characteristics are poor.

"It gives small loaves with poor texture, particularly when baked by the bread-broaster or multi-phosphate formulas. The color of the crumb is decidedly yellow. Garnet cannot be considered a desirable variety.

The report was dated on April 4.

Good Reason For Economy

A food salesman went into a drug store the other day and ordered a plate of crackers and a glass of water. A friend who happened to be in the store store, asked him: "What's the matter, Mac? On a diet?"

"No," snapped the other. "On commission."

"What a silly place to put a wash-basin!"—Sondagness-Strix, Stockholm.

W. N. U. 1940

Fowl Of Canadian Origin

Chantecler Produced In Quebec and Is Hardy Type

There is one variety of fowl that has the distinction of being Canadian in origin. It is the Chantecler which was originated by scientific cross-breeding under the direction of Rev. M. Wilfrid, professor of poultry husbandry at the Oka Institute at La Frappe, Quebec. Rev. Wilfrid's experiments resulted in the production of a breed which had qualities sufficiently distinctive to merit recognition in the year 1910.

The breeds from which the Chantecler is evolved are Cornish, Leghorn, Rhode Island, Wyandotte and White Plymouth Rock. One purpose, which actuated the originator of the Chantecler, was the production of a bird that would be unusually hardy in order to withstand the rigors of the Canadian winter. It was to be both a layer and a good table bird. The comb of the Chantecler has been reduced almost to vanishing point, the purpose of this being to obviate the tendency of large combs to become frozen in winter. The very small comb is called a pea comb.

Need More Canadianism

Dominion Could Organize As Good Broadcasting As The United States

Canadians are almost persuaded against their better judgment that it is better for us to under the auspices of the United States in this matter than under our own Canadian organization. We are pleaded with not even to try the plan of Canadian organization. We are advised to continue to listen to the Star Spangled Banner and its bearers flapping in the breeze and telling us all about the land of the free and the home of the brave. And a great many Canadians no doubt think this is all right. What is needed is a little Canadianism. Just enough to decide that we shall have Canadian representation at Madrid when the allocation of sound waves is decided and just enough to stand up and say that we think we can organize as good broadcasting as New York or Chicago, and with a little more of the Maple Leaf and the American Eagle.—Hamilton Herald.

Not Easy To Answer

How Can Farmer Make Money With Prices So Low

We can tell the farmer to a decimal point how many acres of nod or stubble a man should plow in a ten-hour day with a team of horses or with a tractor. We can inform him of what he should be able to grow to potatoes for 30 cents per bushel. Statistics that the average length of life of a corn-binder is 20.6 years, and that a gang-plow should live to the fine old age of 19.3 years. Yes, we can fairly soap statistics and figures which would make the man on the farm. But honestly, brother, when you ask how to make money selling milk to the factory at something under two cents per quart, and when you yearn for enlightenment on how to wax fat on selling pigs with their boots on at \$4.25 per hundred, we must follow our usual policy of being very frank, and our answer is that we have a sneaking suspicion that you can't do it.—Stratford Beacon-Herald.

THE LIGHT TOPPED BODICE PARIS HAS MADE NO MISTAKE

And what a remarkably chic effect! All you've to do is to decide whether you want this dainty frock for sports or afternoons and then select your fabric.

The sheer woolsens create a very soft appearance. And many smart women wear these interesting new woolsens that assume new formality from morning until dinner.

Rough crepe silk is another delightfully lovely fabric that while sporty may be worn for afternoons.

A new winter printed crepe silk in combination with plain flat crepe is charming for this model.

The raglan shoulders are very slimming and very easily handled by the home seamstress.

Style No. 963 is designed for sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. Size 38 requires 3 yards of 38-inch material with 1/2 yard of 38-inch contrasting.

Price of pattern 25 cents in stamp or coin (coin is preferred) — clasp coin carefully.

Plants Think On Seeing The Light

Scientist Says Vegetable Kingdom Has Brains and Uses Them

When you see a plant bending toward the light, it is thinking.

Its tips have brains, according to experiments conducted by the Smithsonian Institution at Washington. Like human beings and animals, they also have eyes and legs—and use them.

This relation between the vegetable and animal kingdom, discovery of which may have far reaching results, was disclosed by a doctor who has made a study of the actions of plants when exposed to light.

"There appears to exist in the plant a more or less localized region capable of receiving a stimulus," he said. "It has been shown that the most sensitive portion of a coleoptile—the first shoot surrounding the bud of an ascending shoot—is the first fifty millimeters of the tip. The first millimeter is 160 times as sensitive as the second, and 1,800 times as sensitive as the rest of the plant."

The tip of the plant corresponds to an eye. When light strikes the "eye," then the stem of the plant corresponding to the body of the plant as a human being does in walking.

Northern Crown Seed

Herman Trelle Advises Us To Avoid Danger From Rust

Travelers farmers who face the annual rust danger of rust should fight by use of northern crown seed grain, declared Herman Trelle, wheat king, at Edmonton.

Based on Peace River seed used on the southern prairie affected zones had shown practical immunity the first year, while resistance began to break down the second year. That indicates change of seed every third year would prove good insurance against rust. He believed seed grown in northern Saskatchewan would be equally as effective for Manitoba and northern prairie farmers.

Trelle dubbed the research hunt for good milling rust-resistance wheat varieties as a "wild goose chase" and waste of time and money.

A Really New Invention

Quebec Man Has Potato Machine That Works Successfully

The completion of a potato digging machine of his own invention has recently been announced by Joseph Morin, of Ville St. Pierre near Montreal. He claims that it has been inspected by the federal and provincial government authorities and pronounced to be the only machine in existence today that will dig potatoes without injuring the vegetable.

It weighs 800 lb., is made up of twenty component parts and can be hauled by a team of horses or by a motor truck.

Cling To Old Idea

North Carolina Indians Still Believe In "Witch Children"

"Witch children," specially educated from babyhood to be witches, have just been reported by a scientist to still exist among the Cherokee Indians of North Carolina.

These 20th century witches are "made not born," says Dr. Frank M. Obrecht, Belgian ethnologist, in a report issued by the Smithsonian Institution. Children, preferably twins, selected for a career as witches are put through an initiation supposed to endow them with supernatural powers.

Inglorious End Of Glorious Flight

Workmen are shown hauling the wreckage of the plane in which J. A. Mollison (inset), English aviator, made a record-breaking flight from England to Africa, from the Milnerton Beach, Cape Town, South Africa. The aviator crashed on the completion of his long flight while attempting to make a landing on the beach. He flew from London, England, to the tip of Africa in just five days. Mollison was uninjured in the crash and immediately drove to the seashore, where thousands of anxious spectators greeted him.

Probable Carry-Over Of Wheat Is Expected To Be Smallest Since 1928, According To Estimates

Work Under Handicap

Watch Is Not Used By Russian Railways

The lack of watches in Soviet pockets is partially blamed by the Transport Union for recent railway delays. A message from Moscow, "Wrecks occur, trains are late, and the transportation system suffers from lack of co-ordination, when employees cannot determine whether they are operating their trains according to the time-table."

The Commercial Transport, tried the experiment of issuing watches to men as they went on duty, and having them turned in at the close of work, so they would be available for the next shift. This proved unsatisfactory, chiefly because the watches were not given sufficient care. The Union has called on the Commissariat of Supply to speed up the output of watches so that all railway men may have them.

Watermark On Paper

Pulp Is Passed Under Roller Which Bears Inequitable Device

A watermark is a device which is incorporated in the body of a paper. When paper is made by machinery, the paper pulp is passed under a wire roller, known as the "dandy" roll, which bears the requisite watermark device. The paper is thus thinned where the wires of the "dandy" roll touch it, and so, when the paper is finished, these parts are more transparent than the rest. While a large number of postage stamps are printed on watermarked paper, it is incorrect to suppose that a specimen is not genuine because its paper is unmarked. There are many countries which do not avail themselves of this useful safeguard against the forgery of their postage stamps.

Undue Pessimism

Canada Suffering From A National Headache, Says Hon. R. J. Macleod

"We are suffering from a national headache induced by a financial devaluation," said Hon. R. J. Macleod, Federal Minister of Railways and Canada in the course of an address before the Toronto Liberal-Conservative Businessmen's Club at Toronto.

"There is undue pessimism, just as there was undue optimism in the boom days of 1929," he said. "Let us practice some of the spirit showing during the war, and we will be one of the first countries to return to prosperity."

Wheat Bonus

Farm Bonus On An Average Basis Urged Instead Of Bushel Basis

Payment of a farm bonus on an acreage basis instead of on a bushel basis is favored by the Manitoba legislature. In a resolution, the House urges the Dominion Government, if it continues payment of a bonus, to base it on total acreage seeded. The present bonus is five cents per bushel on wheat produced.

Federal action is called for in another resolution which asks an investigation of the price on farm implements and parts in western Canada and a report to the House of Commons. Supporters of the resolution said the price of implements had not come down to the extent the price of farm products had, and would tend to retard economic recovery on the prairies.

DOMINION WILL CONTINUE TO AID IN DIRECT RELIEF

Ottawa, Ont.—The premiers of the various provinces were most emphatic in their expressions of opinion at the Dominion-provincial unemployment conference that no good purpose could be served by spending out an amount of money in the bill to deal with unemployment and farm relief. Prime Minister R. B. Bennett, and Hon. W. A. Gordon, Minister of Labor, so informed the House of Commons when a resolution on relief after May 1 was before the chamber.

"The provinces have had a very difficult experience, especially the newer provinces," Mr. Bennett said, "with a scattered population and large areas, and they felt that it was undesirable to place in a measure of this kind a sum that might be available for the purposes indicated in the resolution."

A measure predicated upon the general view at the discussion will be drafted and introduced in the Commons shortly, Mr. Bennett said. In the meantime, a resolution has been submitted authorizing the Dominion to enter into agreements for relief with the provinces, and pay whatever sums it may be necessary for the Dominion to expend. Power is also contained in the bill to make advances to the provinces. Authority to pay sums for special requirements in the form of grants to the drought-stricken areas of Saskatchewan, for assistance in defraying the cost of the sale and distribution of products of the field, farm, sea, river and mine are also set out. Further power of a similar nature is included.

The Dominion will continue to assist in direct relief. The provinces had indicated they could not continue for financial reasons on the construction programme to provide relief works. But, the committee was told, works now under way which would not be abandoned until the end of the year would be continued to completion. No Dominion public works will be constructed this year except those authorized in the estimates passed by parliament.

To date, Mr. Gordon declared, \$150,000,000 had been spent on public works by way of indirect relief since the fall of 1930. Of the amount the Dominion had contributed \$48,000,000; and the provinces and the municipalities slightly over \$100,000,000.

By way of "direct" relief, the Dominion in the same period had spent \$12,000,000, exclusive of the aid made to the Saskatchewan relief commission.

Total loans and advances made to the provinces since the fall of 1930 amounted to \$43,418,000.87.

The provinces of western Canada, believed, said the Premier, that they would be in a position to meet their ordinary expenditure this year. They hoped to do this by the imposition of taxes on the land, farm and stock, and by the reduction of expenditure. But, whatever developed, the credit of the Dominion must be sustained by sustaining the credit of the provinces.

In certain provinces, continued the Prime Minister, it was argued that the burden of taxation was now almost intolerable. He illustrated the situation by stating that the income tax was now imposed by three separate institutions—provincial, Dominion and municipal governments. It had been suggested that the income tax might well be divided, and that the provinces should be left that portion having to do with private incomes, while the Dominion collected from corporations.

Montreal To Havana Flight

U.S. Flyer Makes Non-Stop Test Trip In Nine Hours

Havana, Cuba.—Louis Reichers, United States flyer, landed here from Montreal, made to test the aeroplane in which he intends to attempt a trans-Atlantic flight this summer.

He made the trip in nine hours three minutes, after leaving St. Hubert airport at Montreal.

Reichers had explained that the length of the Montreal-Havana flight—1,786 miles—was approximately the same distance he would have to fly over water from Harbor Grace, Newfoundland, to Ireland in the two-stop flight he plans to make to Paris in the summer.

The fuel tank of his low wing Lockheed Altair monoplane carried 470 gallons of gasoline when he left Montreal.

W. N. U. 1940

Hop To Australia

C. W. Scott, British Flyer, Makes Journey In Less Than Nine Days

Port Darwin, Australia.—C. W. Scott, British flyer, landed his aeroplane here after a flight from Lympe, England, beating the former record for an air trip between the two countries by seven hours and 36 minutes.

Scott's time for the 13,188 miles was eight days, 13 hours and 36 minutes, and regained for him the record he lost last year when C. A. Butler made the flight in nine days, two hours and 29 minutes, one hour and 42 minutes faster than Scott's previous one.

The flyer took off from Lympe at 5 o'clock on the morning of April 19, and flew by way of Brindisi, Italy, across Persia and India to Sourabaya, Java.

Tour Western Canada

Governor-General and Lady Bessborough Plan Western Trip In August

Ottawa, Ont.—Circumstances permitting, Their Excellencies, the Governor-General and Lady Bessborough will leave Ottawa in the middle of August for a tour of western Canada. Lady Bessborough, who has been visiting overseas, will sail from England on a tour of western Canada, arriving back in the capital about May 9.

BACK TO LAND PLAN IS HELPED BY RELIEF FUNDS

Ottawa, Ont.—Decision of the Federal Government to apply a portion of relief expenditures now being used in supporting unemployed families in enabling such families to gain a subsistence on the land was announced by Hon. W. A. Gordon, Minister of Labor, subject to equal contributions by the province and the municipality concerned. It is proposed to assist families, physically fit and otherwise qualified to undertake settlement, to put themselves on a self-supporting basis. The joint contribution will be sufficient to cover the cost of modest establishment in the way of livestock and equipment in addition to necessary subsistence while the families are getting a start.

"This is in no sense a government-aided land settlement scheme," said Mr. Gordon, "but an application of relief expenditure to enable families receiving relief to contribute to their own maintenance by labor on the land, where they may eventually establish themselves on a self-supporting basis."

Administration of the scheme will be under provincial jurisdiction with respect to the selection of families, location of suitable farms and settlement of families thereon. While responsibility for administration will rest upon the provinces, it is intended that advisory committees, consisting of representatives of province, municipality, federal land settlement branch, Canadian Pacific Railway, Canadian National Railways, will co-operate.

Adoption of the scheme in any locality will be dependent upon the approval and co-operation of the province and municipality concerned.

Many in Villages Deprived By Tidal Wave Without Food

Fairbanks, Alaska.—A picture of human misery "so dire as to be almost unbelievable," was drawn by Pilot Art Woodley upon his return here from a flight over the country between the mouth of the Yukon River and the Hooper Bay region.

The region was struck by a tidal wave last December and several native villages destroyed. Woodley, which rode on the tidal wave, were carried inland as far as 20 miles, they said, and destroyed the Eskimos' winter supply of fish.

Missionaries have given aid, but their resources were reported by Father Menager to be limited. Sickened by the suffering of the natives, and there is a fear of floods as a result of the melting of heavy snows.

Aviator Says Eskimos In Alaska Suffering

Reward Is Offered

E.C. Government Making Determined Efforts To Discover Bombers

Victoria, B.C.—Determined efforts to identify miscreants responsible for long series of bombings of school buildings and other structures, and tampering with railway tracks in the interior of British Columbia, have been launched by the government with the announcement of a reward of \$2,000 for information leading to the discovery and arrest of those responsible for sabotage in the Douglas Harbour area.

R. H. Pooley, Attorney-General, made the announcement following special efforts to trace those responsible for attempted train wrecking and bombings. In addition to the usual police stations in the Douglas Harbour district, 16 special constables have been sworn in under an intensive system of patrol. Guards have been stationed on public buildings.

Premier S. F. Tolmie announced that negotiations were being conducted with the federal authorities in connection with protection of public property on the main transportation system of the province.

Effect Economies

Directors of C.N.R. Have Worked Hard In This Direction

Ottawa, Ont.—The directors of the Canadian National Railways worked hard in the interests of the system, W. A. Hoy, K.C., a member of the C.N.R. board told the House of Commons in a statement on railways and shipping here. Many economies have been effected, and the personnel of the board had at heart the success of the railways. Mr. Hoy cited the report of the sub-committee, of which he was chairman, as indicating the extent to which expenditures had been reduced.

Disagree On Submarines

Geneva, Switzerland.—Indictment of the submarine as the only offensive naval weapon by British and United States naval experts, met with sharp opposition from spokesmen for the smaller powers on the naval commission at the disarmament conference.
